is a practice which plays an important role in relaxing the mind and body and boosting people's immune system. Yoga is an age-old art, which has helped millions of people all over the world to attain a better state of physical and mental health.

Today, it is used by all, mostly by those who are suffering from stress and back pain. Usually yoga is thought to be something related to the exercises of the body, but yoga isn't just exercise. Yoga also makes one's mind stronger and healthier and leads him towards a better way of living. The best yoga websites will tell you about perfect poses for your body, which will help you improve your health in ways that you haven't imagined before.

The practice of Yoga is increasing throughout the globe. One of the main reasons for its popularity is that even doctors are advising patients on the worth of yoga. Yoga is being intensively studied by scientists and it is proven that yoga calms and relaxes both mind and body and uplifts the spirit. It is an exceptional discipline for getting a good mind and keeping yourself healthy.

In India, Prime Minister Narendra Modi inaugurated the first International Day of Yoga on June 21st in 2015. The event also registered two Guinness World Records, one for 35,985 people practicing in a single yoga session at a single venue and the other for most nationalities participating in a yoga lesson.

That way, yoga can support the healing process and help the person experience symptoms with more centered and less distress.

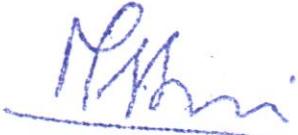

- Yoga improves strength, balance and flexibility.
- Yoga helps with back pain relief.
- Yoga can ease arthritis symptoms.
- Yoga benefits heart health.

- Yoga relaxes you, helps you sleep better.

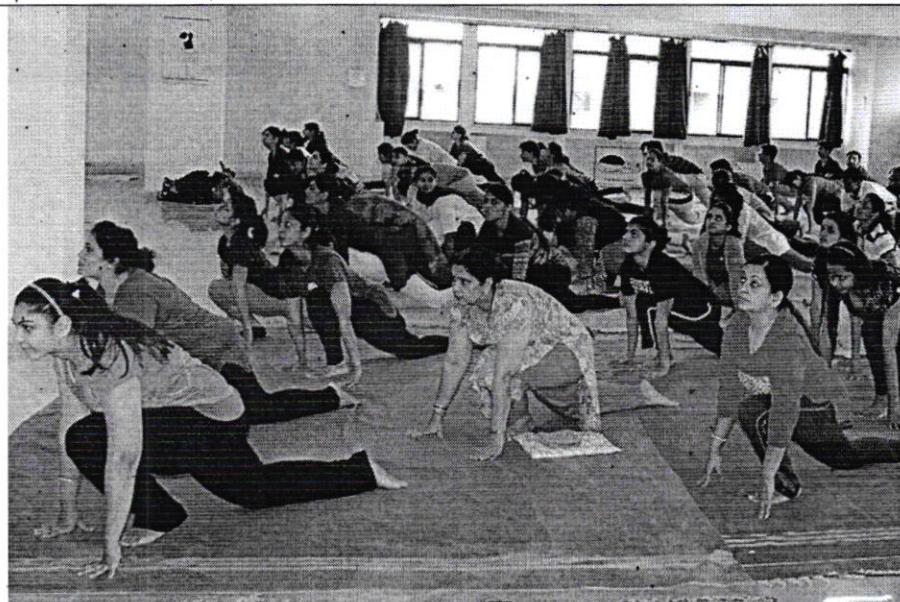

Yoga is very useful because it helps us to control our mind, contributes to health and works as a stress-reducer. The term Yoga means union. A Yogi's ultimate aim is to attain this union with the eternal self with the help of mental and physical exercise
