basis for an enlightened opinion and responsible conduct by individuals, enterprises, and communities in preserving and enhancing the environment."

History of World Environment Day

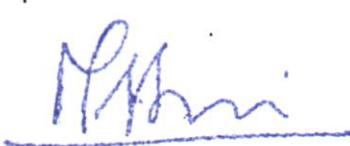

In 1972, the United Nations General Assembly established the World Environment Day on the first day of the Stockholm Conference on the Human Environment. Two years later, in 1974, the first WED was held with the theme "Only One Earth". Even though Environment Day celebrations have been held annually since 1974, in 1987 the idea of rotating the centre of these activities through selecting different host countries began.

Importance of World Environment Day

This year 2021 , marks 49 years since the first conference i.e 1972 Stockholm conference was held that initiated the stride towards achieving a better tomorrow for all, in terms of the environment. The Earth faces multiple problems, such as climate change, loss of biodiversity, an increase in carbon emissions and non-biodegradable waste. With everyone's help and one step at a time, people can make good choices and work towards sustaining the environment with the best conscious choices.
