BRIEF REPORT

Webinar on

E-learning the boon towards sustainable Educational Development

The Department of Electronics & Communication Engineering of East West Institute of Technology organized a Webinar on E-learning the boon towards sustainable Educational Development. The speaker Ms. Vertika shukla, Product manager-Internshala, Dr. Venkateshwarlu Senior Principal Scientist at NAL, Mr. Shashank Krishna SME(IT) were invited to conduct the same. It was organized on the online platform using on 25/07/2020.

The speaker Dr. Venkateshwarlu started his talk by giving introduction about higher education and sustainability which are widely recognized as interwoven concepts. As higher education has an obligation and pivotal position in redefining education for the case of sustainability surpassing its two traditional functions of research and teaching. A challenge is to reassess disciplines and institutional practices to initiate a development to achieve this task.

Ms. Vertika Shukla gave an insight about Disruptive changes happening in many ways – social, technical, and environmental, globally and locally and they have provided an opportunity due to the flexibility of learning process, use of technologies, and new approaches to teaching and learning. As they are the key factors in education for sustainable development. As a consequence, institutions are realigning their education, research, operations, and community outreach activities.

Mr. Shashank Krishna addressed the implementation of E- Learning which appears to be one central requirement in a two fold way: First, implementing E-Learning can be considered as a strategic approach to contribute to (more) sustainability in higher education. Second, implementing E-Learning provides tools that deliver and promote teaching and learning about sustainable development in an innovative and wide-ranging way.
