Dr. Prashanth S C, delivered a talk on “Procedures in Filing a Patent” by enlightening the staff members and students to do quality research that can be patented. The speaker explained the significance of Patents, its usage in an invention.

The speaker proposed his ideas while executing the content essential in the formation of developing a patent.

Consider, If you made a product, your right is to exclude others from using, making and selling the product. Suppose, If you created a new method of using a product, then your right is to exclude others from using that product.

He also explained the requirements of research and continued saying Invention must be new and inventive over conventional products and services existing in the market on the date of filing, so that invention should be kept confidential or else the patent cannot be obtained. As long as patents are concerned, to file a patent application one year is the duration from the date of publication & communication with others.

The seminar concluded formally by proposing the Vote of Thanks by the Dr. Shivakumar, Professor and Head, Department of Mathematics, EWIT.
